SKILLS

HARIPRIYA.T

CAREER OBJECTIVE

Results-driven iOS Developer with 4.3 years of experience in Swift, UIKit, SwiftUI, and GraphQL. Expert in App Store management, payment integration, and pixel-perfect UI delivery.

WORK EXPERIENCE

April 2025 - Present

Matrimony.com | Chennai Software Engineer

- Develop native iOS apps with Swift and UIKit, implementing GraphQL APIs for efficient backend communication
- Build core flows (Login, Registration, Onboarding) and handle push/in-app notifications for user engagement
- Manage the complete App Store publishing lifecycle, including certificates, provisioning profiles, and releases
- Integrate secure payment workflows and collaborate with designers for pixel-perfect UI implementation
- Resolve critical production bugs and bottlenecks, maintaining high app stability and performance
- Handle web-to-app event communication and deep linking for seamless user experiences

Buy4earn Pvt Ltd | Jharkhand Junior Software Developer

Mar 2023 - Oct 2024

- Developed scalable iOS apps using Swift, SwiftUI, and MVVM architecture for e-commerce and fintech domains
- Integrated Google Maps SDK, Razorpay payment gateway, and real-time order tracking features
- Optimized app performance through memory profiling, reducing resource footprint significantly
- Implemented Firebase Crashlytics and Analytics for monitoring and tracking user behavior
- Collaborated cross-functionally to deliver new features in agile sprints, improving user satisfaction

BUSoft Tech I Chennai Junior Software Engineer

Nov 2022 - Feb 2023

- Developed UI components using UIKit with programmatic layouts and implemented VIPER architecture for modular code structure
- Identified and resolved critical bugs in production, ensuring app stability and optimal user experience
- Managed app publishing workflow including TestFlight beta releases and App Store submissions

Nanonino I Coimbatore Junior IOS Developer

Sep 2021 - Oct 2022

- Built a multi-functional app with media sharing, real-time chat, and e-commerce features using Core Data and Firebase.
- Experience with Cocoa Touch (UIAlertView, UIScrollView), Core Data integration, and Firebase login with Crashlytics.
